Timur Naumov

Frontend Developer Intern

Astana, Kazakhstan | +7 776 339 77 96 | timurabishev13@gmail.com
github.com/tnaumovv

PROFILE

Second-year Software Engineering student at Astana IT University with project experience in React, TypeScript, responsive interfaces and REST APIs. Also work with Python, SQL and PostgreSQL. Seeking a frontend-focused internship at TargetAI.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Chakra UI, Radix UI
Integration and state: REST APIs, TanStack Query, React Hooks, React Hook Form
Backend and data: Python, FastAPI, SQL, PostgreSQL, Go
Tools: Git, GitHub, Docker Compose, Vite, terminal/Bash
Testing: Jest, React Testing Library, Node.js test runner

SELECTED PROJECTS

EduBright | Education consultation website

React, JavaScript / TypeScript, Radix UI, React Hook Form | GitHub

- Built responsive sections, accessible dialogs and FAQ tabs; added a consultation form with validation, submission states and a server endpoint for Telegram delivery.
- Added five unit tests covering contact validation, request payloads, server responses and network failures using the Node.js test runner.

AITU Room Booking | Campus reservation MVP

React, Chakra UI, TanStack Query, Go, PostgreSQL | GitHub

- Extended Yuujiso's SVG campus map with room selection, time-slot availability, booking and cancellation flows; retained attribution for the original map.
- Added user and admin views with JWT authentication, frontend tests for booking flows, and a PostgreSQL constraint preventing overlapping reservations.

Study Hub | Interactive study application

React, TypeScript, Vite, CSS | GitHub

- Built a React/TypeScript study app with subject management, flashcards, quizzes and custom hooks.
- Added lecture transcript import, optional AI summaries with a local fallback, browser persistence, responsive navigation and light/dark themes.

Jylu.kz | Clothing donation platform

Python, FastAPI, SQLAlchemy, PostgreSQL; Next.js / TypeScript frontend | GitHub

- Worked on REST endpoints, relational models, database migrations and seed data for clothing lots, pickup locations and reservations.

EDUCATION

Astana IT University

Bachelor of Engineering in Software Engineering | Second-year student
